Report

The Department of Information Technology conducted four day's Add on Course "**J2SE Concept & Programming**" for Third Year students.

The main objective of this course was to give overview of java programming. As Expert gives brief about core java concept to the students. The advantages of core java is as

- Java is easy to learn.

Java was designed to be easy to use and is therefore easy to write, compile, debug, and learn than other programming languages.

- Java is object-oriented.

This allows you to create modular programs and reusable code.

- Java is platform-independent.

One of the most significant advantages of Java is its ability to move easily from one computer system to another. The ability to run the same program on many different systems is crucial to World Wide Web software, and Java succeeds at this by being platform-independent at both the source and binary levels.

Report

The Department of Information Technology conducted four day's Add on Course **"Practical Approach to Python Programming "** for Second Year students.

The main objective of this course was to give overview of python programming. As Python is a trending technology, students enthusiastically participated in the workshop. The trainer Mr. Sagar Nangare conducted theory with practical examples connecting all topics with the real world problems.

On the first day, students learnt the basics of Python Programming which started with Installation process covering all important topics such as loops, data structures & exception handling.

On the second day, topics like List, Tuples, arrays, File Handling was covered with their practical examples .

The third day trainer explained about object oriented concept with python.

The beginning of fourth day was with K-means clustering followed by its practical example then moving on to support vector machine algorithm and by the end of the session Artificial Neural Network was covered.

By the end of the session students got an insight of what Python is and how it works.

Report

The Department of Information Technology conducted four day's Add on Course **“OOP with Java ”** for Second Year students.

The main objective of this course was to give overview of java programming along with oops concept. As Expert gives brief about all object oriented concept along with core java concept to the students. The advantages of core java is as

- 1) The main aim of OOP is to bind together the data and the functions that operate on them so that no other part of the code can access this data except that function.
- 2) Java was designed to be easy to use, write, compile, debug, and learn than other programming languages. Object-Oriented: Allows you to create modular programs and reusable code. Platform-Independent: Ability to move easily from one computer system to another
- 3) Java is object-oriented. This allows you to create modular programs and reusable code.

Subject: Application to organize Add on Course on **"OOP with Java"** from 29th Feb 2020 to 3th Mar 2020.

Respected Ma'am,

Department of Information Technology would like to organize an Add on Course on **"OOP with Java"** on 29th Feb, 1st, 2nd & 3th Mar 2020 from 8:30 AM to 4:30 PM for Second Year students. The session will be conducted by Experts from L& D Infotech, Pune.

I request you to permit us to organize the same and sanction the amount of **Rs. 30000/-** as remuneration for the expert. Following are the objectives and outcomes of the course.

Objectives:

1. To introduce the object oriented programming concepts.
2. To understand object oriented programming concepts, and apply them in solving Problems.
3. To introduce the principles of inheritance and polymorphism; and demonstrate how they relate to the design of abstract classes
4. To introduce the implementation of packages and interfaces
5. To introduce the concepts of exception handling and multithreading.
6. To introduce the concepts of Collection Framework.

Outcomes:

CO1: Able to understand the use of OOPs concepts.

CO2: Able to solve real world problems using OOP techniques.

CO3: Able to understand the use of abstraction.

CO4: Able to understand the use of Packages and Interface in java.

CO5: Able to develop and understand exception handling, multithreaded applications with synchronization.

CO6 : Able to understand the use of Collection Framework.

The course outcomes are mapped with PO1, PO2, PO3, PO6, PO7, PO8, PO12 and PSO1.

Thanking you in anticipation,

Report

The Department of Information Technology conducted four day's Add on Course **“OOP with Java ”** for Second Year students.

The main objective of this course was to give overview of java programming along with oops concept. As Expert gives brief about all object oriented concept along with core java concept to the students. The advantages of core java is as

- 1) The main aim of OOP is to bind together the data and the functions that operate on them so that no other part of the code can access this data except that function.
- 2) Java was designed to be easy to use, write, compile, debug, and learn than other programming languages. Object-Oriented: Allows you to create modular programs and reusable code. Platform-Independent: Ability to move easily from one computer system to another
- 3) Java is object-oriented. This allows you to create modular programs and reusable code.

Add-on Course on “Android Application Development”

Academic Year: 2019-20

Semester: I

Name of Event: Add-on Course

Date of Conduction: 12th, 13th, 18th & 19th July, 2019

Time: 08:30 AM To 04:30 PM

Target Audience: TE Computer Engineering Students

No of Participants: 50

Venue: Computer Center

Topic: “Android Application Development”

Resource Persons: Mr. Anuj Bidkar, Wisdom Sprouts, Pune

Coordinator: Prof. Deptii Chaudhari

Objectives:

1. To learn basics of Android Studio, the default integrated development environment (IDE) supported by Google to develop Android apps
2. Manage user data and multimedia on a mobile device via the Android framework libraries.
3. Use the sensors available on mobile devices to enhance user interaction and feedback.
4. Publish Applications to the Google Play Store.

Outcomes:

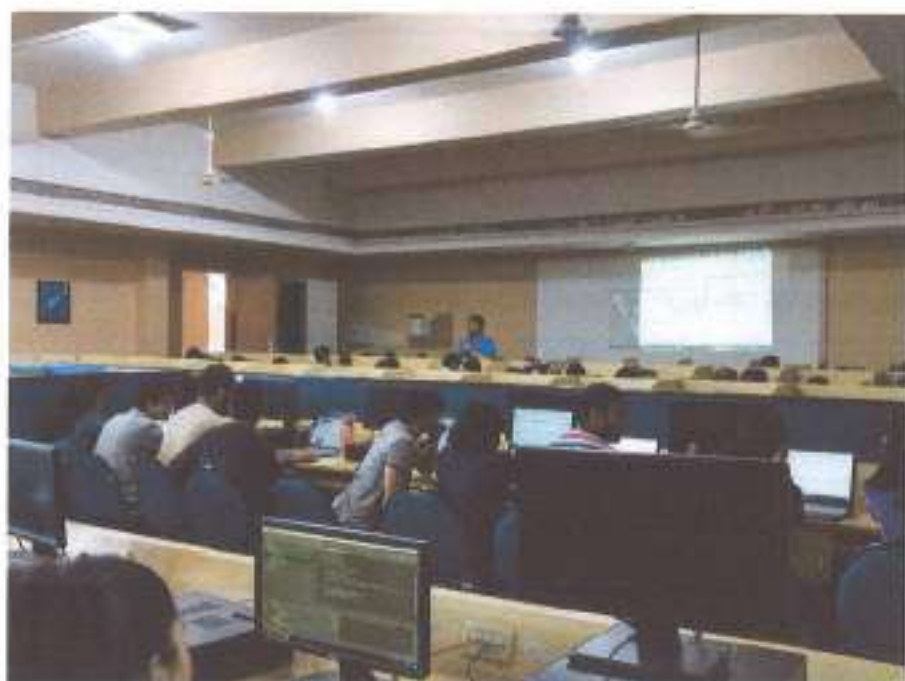

On completion of this course students will be able to

1. Install and configure Android application development tools.
2. Apply Java programming concepts to Android application development.
3. Write simple GUI applications, use built -in widgets and components, work with the database to store data locally

Activity Description:

The add-on course on "Android Application Development" was organized for Third Year Computer Engineering students. Mobile application development is leading field in computer engineering. The hands on sessions conducted during the course enhanced the programming skills and logical thinking of students. During the course students learned how to create an Android project with Android Studio and run a debuggable version of the app. Students also acquired knowledge about Android architecture and the key principles underlying its design. At the end of course students implemented real life problem statements.

Activity Report

Add-on Course on “Python Programming”

Academic Year: 2019-20

Semester: 1

Name of Event: Add-on Course

Date of Conduction: 7th August To 10th August, 2019

Time: 08:30 AM To 04:30 PM

Target Audience: SE Computer Engineering Students

No of Participants: 68

Venue: Computer Center

Topic: “Python Programming”

Resource Persons: Mr. Yogesh P Murumkar, L & D Infotech Pvt.Ltd, Pune

Coordinator: Prof. Deptii Chaudhari

Objectives:

1. To give students basic introduction to object oriented and procedural programming, using Python
2. To learn how to design and program Python applications.
3. To learn how to build and package Python modules for reusability.
4. To learn how to design object-oriented programs with Python classes and use class inheritance in Python for reusability.

Outcomes:

On completion of this course students will be able to

1. To fluently use the procedural statements assignments, conditional statements, loops, function calls and sequences in Python.
2. Understand the concepts of object oriented programming as used in Python: classes, subclasses, inheritance, and overriding.
3. To design, code, and test small Python applications.

Activity Description:

The add-on course on "Python Programming" was organized for Second Year Computer Engineering students to impart programming skills. Python is a prominent programming language with vast usage domain. The hands on sessions conducted during the course enhanced the programming skills and logical thinking of students. At the end of course students implemented real life problem statements.

Subject: Permission for the Add on Course on 22 Feb, 23 Feb, 07 Mar, 08 Mar 2020

Respected Madam,

With respect to the above subject Department of Electronics and Telecommunication is organizing the Add on Course on 15/06/2020 at I²IT, Pune SE E&TC, TE E&TC students on "PCB Designing". The time of the course is from 9.00am to 4.30pm.

The resource person details are :

Name of the Expert: Mr. Avinash Salunke

Affiliation: Systems Engineer

Name of the Industry/Organization: Niruha Systems Pvt. Ltd. Pune

Contact Details(Email & Phone Number): avinash.salunke@niruha.com, 8830398290

Remuneration required: - Free

Objectives of the Add on Course(minimum 3):

- 1) Inculcate circuit designing skills and ability and to use modern design tools.
- 2) To create an interest in the field of electronic design as a prospective career option.
- 3) To inculcate electronic hardware implementation skills by
 - Learning PCB artwork design using an appropriate EDA tool.
 - Imbibing good soldering and effective trouble-shooting practices.
 - Following correct grounding and shielding practices.

Outcome of the Add on Course(minimum 3):

- 1) Design an electronic system/sub-system and validate its performance by simulating the same.
- 2) Students shall be able to use an EDA tool for circuit schematic and simulation.
- 3) Implement electronic hardware by learning PCB artwork design, soldering techniques, testing and troubleshooting.

So we request you to grant us the permission in reference to the subject mentioned above.

Thank you.

Report on Add on Course

Organized by

Department of Electronics & Telecommunication

- 1. Program type:** Add on Course on PCB Designing
- 2. Date & Time:** 22 Feb, 23 Feb, 07 Mar, 08 Mar 2020 & 9.00am to 4.30pm
- 3. Venue:** A-307
- 4. No. of students registered/appeared:** 100
- 5. Target students:** SE E&TC, TE E&TC
- 6. Fee Details:** Free
- 7. Instructor details:** Mr. Avinash Salunke

Niruha Systems Pvt. Ltd. Pune

avinash.salunke@niruha.com

8830398290

8. Objectives :

- 1) Inculcate circuit designing skills and ability and to use modern design tools.
- 2) To create an interest in the field of electronic design as a prospective career option.
- 3) To inculcate electronic hardware implementation skills by :
 - Learning PCB artwork design using an appropriate EDA tool.
 - Imbibing good soldering and effective trouble-shooting practices.
 - Following correct grounding and shielding practices.

9. Outcomes:

- 1) Design an electronic system/sub-system and validate its performance by simulating the same.
- 2) Students shall be able to use an EDA tool for circuit schematic and simulation.
- 3) Implement electronic hardware by learning PCB artwork design, soldering techniques, testing and troubleshooting.

Subject: Letter of Appreciation

Dear Sir,

On behalf of International Institute of Information Technology (I²IT), Pune we sincerely thank you for your kind support and gracing the occasion as a Resource Person for "Add-on Course on PCB Designing" for SE E&TC, TE E&TC students on 15/06/2020 We wish to extend our deep appreciation to you for giving us your valuable time.

We look forward to your guidance and kind support in future.

Warm Regards,

Dr. Vaishali Patil
