Vishesh Waghmare TE

Ishali Jadhav TE

Sahej Singh Chandok TE

Number of Participants: Total Participants-255

Day 1 -157 participants

Day 2 -118 participants and 600+ views on YouTube

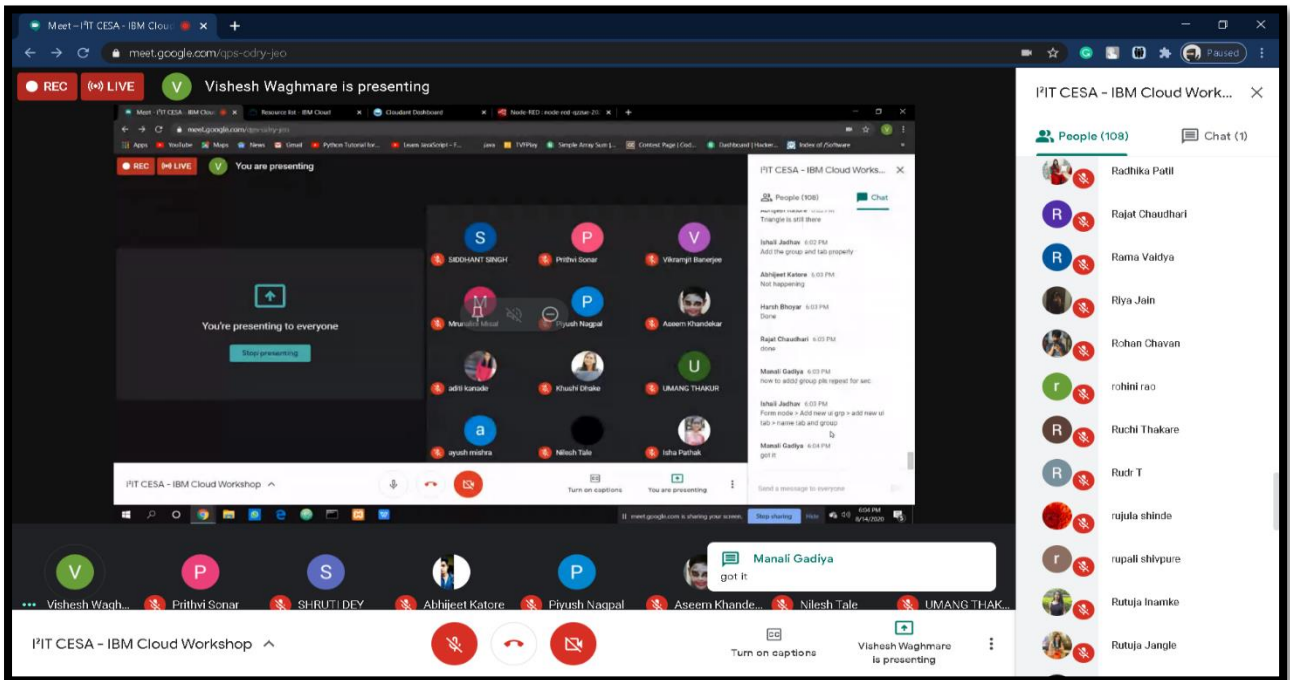

Activity Description in Nutshell:

The members of CESA I2IT arranged a workshop on IBM Cloud, there were a total of 255 participants over 2 days of workshop. It was arranged through Google Meet and YouTube live where the participants could join for accessing the workshop. Day 1 of the workshop was carried by demonstrating The Node red basics by creating a simple registration form and login form. And explaining concepts of IBM cloud that could be used for developing the live project.

On Day 2 the services available on the IBM cloud were explained and some were demonstrated. The services like IBM Watson Assistant and IBM Discovery were used for demonstrating the creation of an electronic store chatbot. The workshop ended with every participant creating its own live project of a chatbot through the help of IBM cloud & its services.
