Activity Description in Nutshell: This Value Added Course on "Power BI" was organized by the Department of Computer Engineering for Final year students on 22nd & 23rd August 2022.

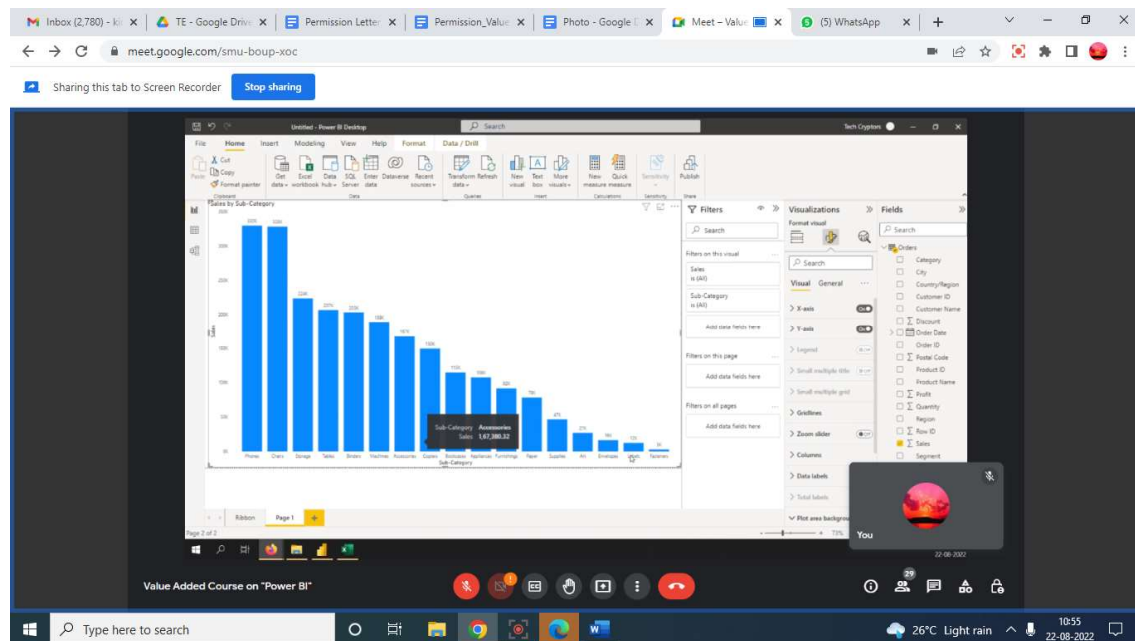

Mr. Onkar Nagarkar & Mr. Yadnesh Mohan Zagade Senior Research & Development Engineer, Senior Research & Development Engineer C.E.O. & Founder- Tech Cryptors has conducted the same through MoU with our institute. Today many companies are looking forward to data analytics and visualization experts rather than just the programmers. It was organized to help and support students to build the understanding towards fields like Data analytics and Visualization using tools like BI required for many big companies. It was a fully hands-on session for our students where students were engaged in its practical assignments. Tutor gave daily assignments for every day covering points. They provided the solutions to various issues faced by the students during the session.

They also shared the information regarding opportunities for internship and placements in their company. This 2 day course ended with a quiz to see the learning throughout and discussed the solution of the same.

Mr. Onkar Nagarkar while demonstrating use of different charts in Power BI

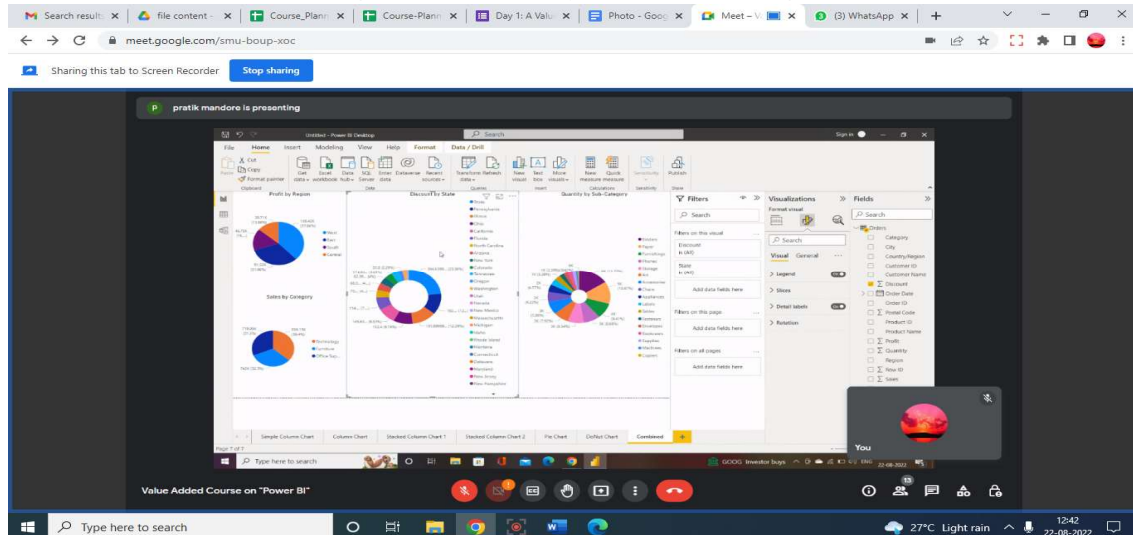

Student discussing the assignment work done by sharing screen

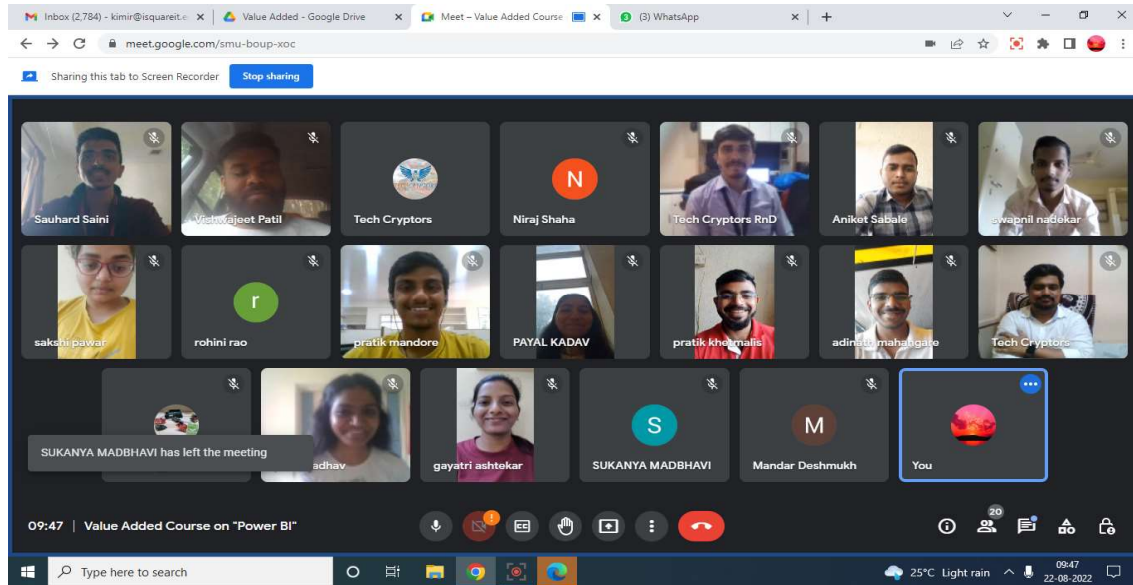

The screenshot shows a Google Meet session with a screen recorder. The main window displays a Power BI dashboard titled "Tech Cryptors RnD is presenting". The dashboard features a table with columns: Sub-Category, Sales, Profit, Average of Quantity, and Count of Discount. The table lists various products like Machines, Servers, Routers, etc., with their respective sales and profit values. On the right side of the dashboard, there are filters and visualizations. A chat window on the right shows messages from participants: pratik mandore (10:11), pratik mandore (10:17), Tech Cryptors RnD (10:19), and SAMRUDDHI KADAM (10:21). The chat messages discuss the company's categories and products.

While solving issues faced by students during the session

The screenshot shows a Google Meet session with a screen recorder. The main window displays a Power BI dashboard titled "pratik mandore is presenting". The dashboard features several charts, including a pie chart titled "Sales by Category" and a donut chart titled "Sales by Region". The charts show the distribution of sales across different categories and regions. On the right side of the dashboard, there are filters and visualizations. A chat window on the right shows messages from participants: pratik mandore (10:11), pratik mandore (10:17), Tech Cryptors RnD (10:19), and SAMRUDDHI KADAM (10:21). The chat messages discuss the company's categories and products.
