ABOUT PROGRAM

Augmented Reality and Virtual Reality is the fastest and emerging trends having their vast applications in the field of education, health and transport. The billion-dollar technology, augmented reality, is a new revolution in business sector. Customers want to have a unique and personalized experience whenever they buy a product. Augmented reality makes it possible. AR-VR enables the addition of virtual objects into real environments to facilitate real-time interaction. The use of AR-VR has become more accessible as it no longer requires specialized equipment and may easily be used on mobile devices. Due to this it has large applications in education and medical field. The use of AR-VR may increase student learning motivation and contribute to improved academic achievement.

PROGRAM OBJECTIVES

- To learn basic concepts of Augmented and Virtual Reality.
- To understand geometric modeling and virtual environment.
- To study about Virtual Hardware and Software required for developing Virtual Reality applications.
- To augment a real time system like digital entertainment, education, healthcare etc.

ABOUT CONTENTS

- Introduction VR, AR and MR
- Applications of VR, AR and MR
- How VR Works?
- Google Cardboard - Low cost VR Headset
- Process of Building App for VR and AR
- Demo of VR-AR App development using Unity
- 3D modeling for VR
- VR for Industry 4.0 and Digital Twin.

IMPORTANT DATES

Course Duration: 23/12/2021 to 29/12/2021
