

Gravel Road Repairing Work by NSS Volunteers in Devale

Academic Year: 2022-23

Name of the Event: Gravel Road Repairing Work by NSS Volunteers in Devale Village

Date & Time of the Event: 12th February 2023, 8:30 am to 1:00 pm

Venue: Devale Village of Maval Tahasil

Event Coordinator: Dr. Sandeep Varpe, NSS Programme Officer

Number of Participants: 50

Activity Description in Nutshell:

Repairing gravel roads with the help of NSS (National Service Scheme) volunteers in a village involves a series of organized steps. Gravel roads are commonly found in rural areas, and their maintenance is crucial for transportation and connectivity.

On 12th February 2023, around 8:30 am, students started working on the road that connects the orphanage to the Devale Village. Due to heavy rain in the area the road was damaged, and it is creating lot of problems for transportation. This road is connecting one orphanage in the nearby area to the main village. This was causing problem to the children to go to their school. Thus, the NSS students identified this road construction problem and started the work.

The road condition was very bad, it is uneven at various places, and it was hard for vehicles to drive through. Students worked together, levelled the road by using mud and soil,

and stones available in the hill side. It was a moment of extreme delight when a school van was able to easily drive on the road.

Our heartfelt gratitude goes out to everyone who contributed to the success of this meaningful event. The enthusiasm, dedication, and support received from all participants, volunteers, and partners played a vital role in making this event a memorable one.
