

**Activity Report  
“Bridging Gap” Skill fit challenge**

**Academic Year:** 2023-24

**Name of Event:** Guest lecture on “Bridging Gap” Skill fit challenge

**Topic:** “Bridging Gap” Skill fit challenge

**Chief Guests:** Vivek Titarmare

**Date & Time of Conduction:** 23rd January 2024, 15:00 - 17:00

**Targeted Audience:** BE & TE

**Venue:** CC

**Number of Participants:** 51 students from BE, 45 students from TE

**Activity Description:** The event's Chief guest has been working in Corporate for more than 24 years. He is working with the government of India under the Skill India campaign. He guided students about corporate life and the current situation of the IT sector. He told students what skillsets they must have to get a good job and survive in the IT sector. He taught students about how to bridge the gap between actual industry and academics. He is also a successful Entrepreneur and allowed students to work with him.

**Event Photos:**

**What are the main skills required by the future job market of the digital economy?**

While repetitive tasks will most likely not be needed anymore (as robots can take those on), there are certain core technical skills that will be required no matter the field of expertise, such as:

- Big data
- Data analysis
- Software development
  - App and web development
  - Artificial intelligence (AI) and machine learning (ML)
  - User experience (UX)
  - Robotics
  - Process automation
  - Database and system administration
- IoT
